

Environmental Policy Gunma Plant

【Basic Philosophy】

Gunma Plant is conscious that it conducts heat treatment, brazing, HIP and machining, and provides solutions with high technology to many industrial fields. In doing this our production activities consume a lot of energy and raw materials and burden the environment by releasing heat to the atmosphere and discharging waste. With this understanding in mind, all employees shall be aware that our production activities release a lot of heat and waste discharge, and as such are actively involved in environment management activities to promote the continuous reduction of the environmental cost.

【Basic Policies】

1. We shall save energy and improve efficiency, prevent environmental pollution, sort and reduce waste, save resources, and undertake recycling activities.
2. We shall always understand the environmental impact of our production activities and all related activities, and continuously improve the environmental management system alongside promoting the prevention of pollution and the protection of the environment.
3. With regard to our production activities, we shall comply with environmental laws, regulations, ordinances, and other requirements we agreed to.
4. To achieve the environmental policy, we shall set up environmental objectives and targets, and the whole plant promotes environmental management while regularly reviewing the objectives and targets.
5. We shall inform all employees and all concerned about the environmental policy and ask for understanding and cooperation. Furthermore, as a member of the local residents, we shall disclose information whenever we have external requests.

【Scope of Application】

Gunma Plant: 983 Shimoshinden, Tamamura, Sawa-gun, Gunma, 370-1132

Scope: Manufacture of aerospace and industrial parts (heat treatment, brazing, welding, HIP, diffusion bonding, and machining)

Personnel: All personnel who work under the control of Gunma Plant in the applicable site.

Gunma Plant
Plant Manager: Mitsuo Okuwaki
