

Environmental Policy Shiga Plant

【Basic Philosophy】

Metal Technology, Shiga plant is a manufacturer, engaged in heat treatment, HIP, bonding and other metal processing activities spanning aviation, and industrial equipment. We are located in Aisho town, Aich district, Shiga prefecture, which is the east of Japans' mother lake, "Lake Biwa". Since we consider protection of the environment as an integral aspect of our management, we will set up our policies as follows.

【Basic Policies】

Based on our basic philosophy, we shall actively promote the following articles as a course of action.

1. Evaluating the activity of our plant, the quality of products and services, scales, and environmental impact, we strive to reduce the environmental burden and prevent environmental pollution giving consideration to biodiversity and ecosystems through resource and energy saving, and an appropriate storage management and process of waste.
2. We shall comply with environmental laws, ordinances, and other requirements.
3. We shall set up environmental targets and environmental management systems within the technological and economically feasible range, and strive to improve our environmental performance and environmental management system through continuously conducting reviews.
4. We shall document the environmental policy, inform all employees about it, and disclose related information whenever we have external requests.
